## Technical Skills

- **Proficient:** HTML, CSS, JavaScript, Typescript, SCSS, AngularJS, NodeJS, MongoDB, Firebase, AWS Services (Route53, EC2, ElasticBeanstalk, s3...etc), Git, ExpressJS, C#, C++, Java, Linux, PostgreSQL, .Net
- **Exposure:** Python, Unity, Assembly, SQL, Azure,

## Work Experience

- CCI-DRC | Fullstack Engineer | Freelance** <https://www.drc-cci.com/> **September 2023 - current**
- Created the Frontend of the website required by the client using latest technology Angular17, slick-carousel, Angular Animations, Angular Material, Bootstrap, Observables, Pipeline, etc..
  - Transformed the provided Figma design into pixel perfect UI responsive (mobile, desktop and tablet)
  - Architected and designed the backend using NodeJS, Express and Firebase in a way to make data access fast and reduce the database reads that saved 80% more money rather than the old mongoDb cluster
  - Created an Admin Dashboard to modify and update the site data with a Realtime Firebase response
  - Handling file and Image uploads and decoupling website images from the backend
  - Deploying the application on AWS and securing the site using SSL Certificate
  - Bought the domain from Namescheap, deployed the frontend on AWS s3 and the backend on Elastic beanstalk with a load balancer for the backend and routed the domain through route53 as well as the professional mails for the firm in addition to CloudFront Global CDN
- Outco Inc | Application Specialist | Upwork** **June 2023 – September 2023**
- Assisted students and people recently joined the tech career to get ready and apply for interviews.
  - Helped the company database system to eliminate manual data entry by automating the database records to eliminate the error margin and save time and money.
- StMarkChurch | Fullstack Engineer | Freelance** [Figma Design](#) **March 2023- June 2023**
- Transformed the Figma design into pixel perfect responsive web Application.
  - Used Swiper, Bootstrap to add a modern look.
  - Used .NET for the backend with PostgreSQL and C#.
- Link Development | Frontend Intern | Maadi, Cairo** **June 2022 – August 2022**
- Took an amazing internship where I developed my front-end skills dramatically and was taught the fundamentals and solid rules of efficient, clean code and smart web development.
  - Throughout the internship I was able to complete all given tasks and challenges, took my SCSS and Angular experience to a whole new level under great mentorship.
  - Learned about Accessibility and developed accessible web pages (dark theme, font changes, smart scrolling)
  - Learned how to work with a team professionally on Azure and how to communicate and report to a senior.

## Education

**Bachelor of Computer Engineering** Ain Shams University **Fall 2019 -current**  
**IGCSE , BRS ( British school in Egypt) 6 A\* 3 A's** **Fall 2016- Spring 2019**

## Certification

**NodeJS - The Complete Guide (MVC, REST APIs, GraphQL, Deno),** Udemy **Current**  
**Angular & NodeJS - The MEAN Stack Guide,** Udemy **September 2023**  
**The Complete angular course,** Udemy **June 2023**  
**CCNA ,** Cisco Academy **August 2023**  
**Sprints Frontend Course,** Sprints **June 2021**
